

Why **iconCFD** Platform?

- Low cost access to state-of-the art CFD, previously only affordable by the very largest companies
- Approximately 10% of the typical costs required to achieve the same outcomes with other current software – potential savings of \$100,000's
- More accurate, easier to use and just as robust
- No need for in-house IT infrastructure, staff or support to install or use the application
- No capital equipment required - better cash flow
- No delays or expensive/time consuming training required – up and running the same day
- Immediate access to the application, as and when needed during your project
- Browser interface for mobility and security
- High security data centre to protect all data
- Massively scalable to match project needs
- Expert simulation and systems support included
- Enables remote team work through simulation data sharing
- Helps you develop products with a competitive edge

"Tokyo Challenge 2020" focused on Aerodynamic improvements for a top level track cycling team

ICON has been an expert CFD engineering partner to industry for over 25 years. Its team of CFD/CAE experts and aerodynamicists has delivered more than 100 OEM Wind Tunnel and CFD campaigns worldwide in the last 5 years. With a global presence and offices in Europe, America and Asia, ICON ensures a continuous support.
